

## Tenure-Track position in the School of Industrial & Intelligent Systems Engineering

### Job Description:

The School of Industrial & Intelligent Systems Engineering at Tel-Aviv University invites candidates to apply for a tenure-track or tenured senior faculty position at all ranks (Assistant Professor, Associate Professor, Full Professor). We seek outstanding candidates in all fields related to Industrial & Intelligent Systems Engineering, with a focus on operations research and management science, data science, human-computer interaction, robotics, or systems engineering.

The successful candidate is expected to develop independent and collaborative research, pursue competitive research funding, and publish in top international peer-reviewed journals. Additionally, they are expected to teach both basic and advanced courses, while also supervising master's and Ph.D. students.

This role offers the opportunity to be part of our growing school's vibrant and supportive research community, working with brilliant students and fostering strong collaborations with Tel Aviv's high-tech sector and nearby healthcare centers.

### Requirements:

- Ph.D. degree in Industrial Engineering, Computer Science, Information Systems or related fields.
- Strong record of excellence in research

### How to apply:

Interested candidates should send an email to [netara@tauex.tau.ac.il](mailto:netara@tauex.tau.ac.il) with the following documents:

- Cover letter
- Curriculum Vitae with a list of publications
- Research statement
- A list of recommenders (at least three)
