Looking for a MSc or PhD student for a project in Machine Learning and Nonequilibrium Physics

We are looking for an excellent and highly-motivated graduate student to join a new and exciting project focused on developing deep graph-neural-network architectures for studying complex systems driven far-from-equilibrium.

Requirements
- BSc or MSc in Physics or Physics+CS or Physics+EE
- Experience or relevant courses in machine learning

Contact:
Dr. Gili Bisker bisker@tauex.tau.ac.il & Dr. Dan Raviv darav@tauex.tau.ac.il, Faculty of Engineering
Please send us your CV, grade transcript, and a short description of your research interests

* The project is funded by the TAU Data Science Center
